

Specialists in safer working environments.

GAMME Potelet® LIMIT

WHY CHOOSE POTELET® ?

DISCOVER WHAT MAKES THE DIFFERENCE

Fast replacement of cassettes

The cassette system surrounding the belt is designed in a way that makes their replacement easy and fast. If you wish to replace the belt, it won't be necessary to replace the entire stanchion. We offer the option of replacing the cassettes.

Base with floor protector

The ultra thin base of our posts has a solid, strong and rubber protective pad to avoid scratching or imperfections to the floor.

Ultra thin base DDA Regulations

At POTELET®, we make sure that our products follow DDA regulations in order to make them efficient for physically challenged individuals.

With the ultra thin 1 cm high base we guarantee the flow of the queues and the blending of the stanchions with their surroundings.

Security lock

We offer the option of adding a security lock in the connection of the belt with the post. Using a red button with a spring we avoid an accidental unhooking of the belt, thus providing better security.

Slow retract braking mechanism

To roll up the belt our products include a slow retract braking mechanism of the latest technology to ensure maximum security.

WHY CHOOSE POTELET®?

QUALITY, EFFICIENCY AND ADAPTABILITY

Fully personalisable

We are experts in quality customization of our products.

The posts are a great advertising space where people have to stand in line. This is why we understand the importance of an adequate customization as a major

part of corporation marketing.

The customization of the belt with logos, sentences and different colours is the most effective option, as well as the tops of the posts. We offer several colours and finishes for the

stanchions, and for the most creative ones, the design of adaptable vinyls to the surface of the posts to make more striking finishes.

Range of options

We offer a great variety of products for the management of queues, as well as a range of necessary accessories for the creation of effective systems in the desired space.

We offer stanchions with retracting belt, wall elements with extensible belt to close hallways, posts with rope for the most elegant spaces, banners to separate areas, industrial posts for the

most hostile environments and accessories to facilitate the use of all of them.

CUSTOMIZATION

THE MOST EFFECTIVE WAY OF PROMOTING YOUR BRAND

COLOURS AND FINISHES OF POSTS

At POTELET®, we offer a wide range of colours and finishes for our stanchions, making sure that they adapt to all types of uses or environments.

We offer our standard palette of chrome, satin stainless steel and gloss stainless steel posts. Our standard palette is composed of the most common colours and finishes, but we also make special finishes and any colour of the RAL palette under request.

ROPE COLOURS

CUSTOMIZATION

THE MOST EFFECTIVE WAY OF PROMOTING YOUR BRAND

PRINTING OF THE BELT

The use of belts is a very efficient method of catching the attention of customers and transmitting your messages to them. An exceptional place to advertise to customers standing still.

The low price of the replacement cassettes will allow you to continuously update the belts with marketing messages or sponsors. You will be able to add texts, graphics, messages and promotions with your own design.

At POTELET®, we have a deep experience in the design and printing of belts and, therefore, we offer a design service to prepare custom artistic designs, ensuring that your design not only complements the space but also improves the queuing system.

CAP OF THE POST

We also offer the possibility of customizing the cap of the post.

Its position at the top is a very visible place for the user who is standing in line, which is why its customization is highly advisable. Print your company logo, a QR code, a sentence or an image.

TAPE COLOURS

CUSTOMIZATION

STEPS TO FOLLOW

1. CHOOSE A MODEL

Take a look at our catalogs and choose the separating post that best fits your needs. In the details of every model you will find the options that they offer:

End of post/belt

There are three types of ends and finishes of belt. By default, every stanchion has a hook and a belt with quick-lock.

Quick-lock

It's the simplest, the belt ends with the belt clip for the other stanchion or wall mount.

Security lock

Includes a security button to secure the belt clip to the other stanchion.

Anti-panic lock

Fixed part secured to the wall where the end of the belt from the stanchion is placed.

End without belt

It's the post without belt. It is used to buckle the belt of the other stanchion.

Colours and finishes of the post

Every model offers different colours of the RAL palette, as well as different finishes. We also make special finishes for particular orders, don't doubt to ask.

2. BELT CUSTOMIZATION

Depending on the model you choose, you will need to decide the colour for the belt, the rope or the chain.

Length of the belt

The models with belt offer different lengths depending on their capacity. This helps guarantee as much stability as possible. The width of the belt is always 5 cm.

Customization of the belt

- Send us the vectored logo in .ai, .cdr or .pdf format with the printing colours of the Pantone palette.

- The printing of the logo can be made on one side or two sides without any additional cost. In the logo printing in two sides they can't overlap, which means that the logos on one side should be on the blank spaces of the other side.

CUSTOMIZATION

STEPS TO FOLLOW

- We will make the design of the belt and we will send it to you for confirmation.
- We will print the belt by a process of sublimation, considering that it is the method that has resulted in the highest quality and durability of the printing along the years.

3. CUSTOMIZE THE CAP

The top cap of the stanchion is made using white PVC. Considering that it is a very visible place for the pedestrian who is waiting in line, we offer the option of customizing it.

For the customization of the cap, we just need the logo or the image in high resolution (if we already have the logo for the customization of the belt, this won't be necessary). The diameter is 5 cm.

4. MORE OPTIONS

Vinyl

We also offer the option of customizing the post with removable vinyl. Send us the vectored illustration of the logo or the illustration and we will place it on the stanchion.

The vinyl of the posts deteriorates with time, which is why we recommend its use only for temporary events.

Printing of sign

The sign frame is a rigid support with printed information of interest for the pedestrian: a sign, a pictogram, a text, an image, etc. It is compatible with the sign frame, wall elements and posts.

If you wish, we can print anything you want on it. We also put at your disposal a list of pictograms, so you can choose the one that suits you best.

Banner panels

The banner is the model that allows you to divide spaces with an extended panel between two stanchions. Thanks to the micro-perforated panels, logos, illustrations or vectored images can be printed on them. Send us the logo, the illustrations or the vectored image and we will print them.
